24) Put the needle on the other half of the thread and then pass through the upper hole of the nearest Rulla.

25) Now put the core bead inside ...

26) ... and repeat steps 8 - 23 ...

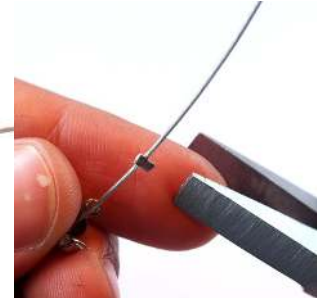

27) ... until the entire bead is covered.

Working with a beading wire

28) Cut a piece of beading wire, a little bit longer than the length of the necklace you wish to make. String all the beads you wish to use on the wire.

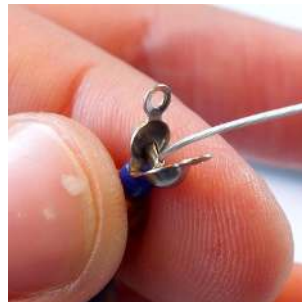

29) Take one end of the wire and after the last bead string a bead tip (closed end first) and then one crimp bead. (You can put a bead stopper on the other end to avoid spilling beads). Then squish the crimp bead with flat-nose pliers.

30) Cut off the tail of the beading wire and close the bead tip. The crimp bead should be hidden inside the closed bead tip.

31) Repeat steps 29 and 30 on the other end of the wire.

32) Attach a clasp.
